

Timur Bey II

Front-end Web Designer
www.DesignTimur.com

Overview

I am a web 2.0 designer with a focus on user experience, marketing, and branding. I have skills creating and turning photoshop mock-ups into wireframe, defining target audiences to develop effective marketing strategies, and effectively designing website layouts, functions, and features from user focused research. With 4+ years experience implementing technologies such as html, css, xhtml, and actionscript and 2+ years implementing technologies such as JQuery and Ajax, I've worked closely with clients to produce dynamic, mainstream, and professional, table-less layouts and websites.

Objective

To take my design, development, and technical skills to the next level creatively and have the opportunity to challenge myself and grow with the company I am hired for.

My Skills

Software: Dreamweaver CS(2-5), photoshop CS(2-5), illustrator CS(2-5), fireworks CS(2-5), flash CS(2-5), shopify, PayPal Shopping Cart, sharepoint.

Languages: html, xhtml, css (1,2,3), php, JQuery, Ajax, xml, action script, liquid (RubyOnRails Base).

```
<div id="contentBox">
  <p></p>
</div>
<div id="buttons">
  <a href="#" onMouseover="moveup()" onMouseout="clearTimeout(moveupvar)"></a>
  <a href="#" onMouseover="movedown()" onMouseout="clearTimeout(movedownvar)"></a>
</div>
```

Platform: Mac OSX 10.6.3 Leopard & Windows XP/7

Other: Website maintenance, Photoshop Mock-ups/Layouts/Banner/Ads/Website designs, CMS, search engine optimization, e-commerce setup and support, solid communication skills, website analytics, W3C standards, and project management.

My Work

La'Cocoa Zora

www.LaCocoaZora.com

Raleigh, NC (11/09 – 5/10)

- Worked closely with client to conceptualize natural earthy color scheme and design
- Created site graphics using photoshop and illustrator
- Used photoshop to create earthy sand like tiled background pattern
- Integrated and customized flash vertical scroll menus w/ color transition roll-over scroll bar
- Customize Highslide JS Media Viewer to incorporate flash vertical slide show and scroll feature
- Utilized liquid markup to implement shopify shopping cart (ie. { % tablerow item in items cols: 3 % })
- Created vector logo for blog and company website using illustrator
- Embedded flash text slideshow with fade transition
- Customized blogger™ layout and design
- Optimized favicon for small pixel quality & cross browser compatibility
- Implemented Ajax animated collapsible DIV menu
- Incorporated Google analytics code for site optimization
- Retouched "about me" page photo image using photoshop

Mobile Services Pro

www.MobileServicesPro.com

Laurelton, New York (1/13/09 -5/09)

- Used css "z-index" property to implement dynamic static navigation (ie...position:relative; z-index:4;)
- Created background stripe pattern and site layout using photoshop
- Designed website background with vector image notary seal
- Retouched photoshoot image using photoshop and implemented Javascript slideshow ads
- Worked closely with client to generate smooth content flow
- Use css and JavaScript to modify the opacity of HTML for png fading effect and IE5+ browser compatibility
- Researched target market to determine scope of design
- Arranged photoshoot for client and retouched image for homepage banner using photoshop

Timur Bey II

Front-end Web Designer
www.DesignTimur.com

My Internet Kiosk & Urban ATM Management

- Used industrial + grunge like design concept to convey creative, clean, and professional design/layout
- Used css and div tags to create floating tables
- Crated site background using photoshop
- Used photoshop filters to create grunge-like navigation background image
- Embedded and linked pdf product brochures

www.MyInternetKiosk.com

Jamaica, New York (12/10/08 – 7/09)

- Implements png transparency for IE5+ using JavaScript filters and css (ie. `var mypng = bg.substring(5,bg.length-2);`)
- Created customized site buttons for main and product pages using photoshop
- Customized site banner using stock images with photoshop
- Adjusted image quality to load 40kb to 70kb for less memory usage and site optimization

Cre8tiv Images Photography & Art

- Worked closed with client to determine effective user experience
- Created site layout and design concept using photoshop
- Use css “scrollbar” property to customize scroll bar color for each page
- Used horizontal scroll feature to implement image gallery thumbnails

www.cre8tivimages.com

Orlando, Florida (3/07 – 5/07)

- Helped categorize client site content for total webpage projection
- Used simple JavaScript to implement one-page image gallery

Twist Hair Studio

- Used flash and action Script to deploy full site
- Implemented flash shake effect for site navigation using action script code on text
- Design site layout and graphic using photoshop then implemented into flash layout
- Created advanced image button object using movie clip and motion components with actionsript (ie. `_root.image.onEnterFrame = function() {}`)

www.twisthairstudio.com

Winter, Florida (8/06 – 2/07)

- Animated site logo for page to page transition
- Used “_blank” action property to get URL within flash content
